## SCHEDULE D - APPAREL

### REFERENCE:

<http://docs.cams.com.au/Manual/GeneralRequirements/GQ05-Schedule-D-2016-1.pdf>

### RATIONALE:

To make changes to the application of helmet standards in Schedule D as per the following:

- Changes to the application of helmet standards for up to, and including, National level events.
- The application of helmet standards will now either specify the required Frontal Head Restraint (FHR) standard for the helmet or permit the use of FHR tether anchors marked with a required standard.
- The application of an expiry date for some Level A helmet standards, with these helmet standards removed from Level A to Level B following the expiry date.
- The move of some helmet standards, previously permitted for use at Level A, to a Level B helmet only. This is to ensure that only a helmet suited to the use of FHR is applicable for Level A.

### ACTION:
